ABSTRACT: This reflection aims to compile the different school objects found during an ongoing research, which purpose is to determine the Escola Superior de Dança path. Preliminary and deductive reflections may arise from this object list and from the experience as a former student and as a current teacher in this institution. Within the scope of dance education and in the higher education context, we believe that the Escola Superior de Dança path may also be determined through the use that teachers and students do of school objects, believing that education improvement is also based on the ability to use and re-use them nowadays.
