OpenDOAR 20-Oct-2013

The image features the Google Scholar logo centered against a cosmic background. The background is a dark, star-filled space with a prominent, glowing spiral galaxy in shades of orange, yellow, and blue. Numerous bright, white and blue stars are scattered throughout the scene. The Google logo is rendered in its signature multi-colored font (blue, red, yellow, blue, green, red), and the word "scholar" is written in a smaller, white, sans-serif font directly beneath it. The entire logo is set within a soft, white, circular glow that fades into the surrounding space.

FCT anuncia política Open Access na abertura da 3ª Conferência Luso-Brasileira de Acesso Aberto

A 3ª Conferência Luso-Brasileira de Acesso Aberto realizada em Lisboa nos dias 1 e 2 outubro arrancou com o anúncio pelo Prof. Miguel Seabra, Presidente da Fundação para a Ciência e Tecnologia, de que será apresentada ainda no mês de outubro a definição da política Open Access deste organismo financiador da ciência.

A sessão de Abertura das comunicações da Universidade Nova de Lisboa, que acolhe a Comissão de Acesso Aberto da FCT, foi presidida pelo Prof. Maria Carmem Monteiro, do Instituto Brasileiro de Física e Tecnologia (IBICT), e pelo Vice-Reitor da FCT, Prof. Rui Vieira.

Depois de uma sessão de comunicações por convite da comissão organizadora:

- 10 Anos de acesso aberto no mundo lusófono - Ricardo Saraiva (Universidade do Minho), Blanca Amaro (IBICT)
- An overview of 2012 so far - Alma Swan (SPARC EUROPE)
- Research impact - Cameron Neylon (Public Library of Science)
- O desafio de se tornar um país de acesso aberto

growth and access to
knowledge

Enabling access to knowledge in developing and transition countries

Working in collaboration with libraries in more than 60 developing and transition **countries** in Africa, Asia, Europe, and Latin America, EIFL enables access to knowledge for education, learning, research and sustainable community development.

EIFL is an international not-for-profit organisation based in Europe with a global network of partners. We run a wide range of **programmes** and **events** designed to increase access to knowledge. Read about EIFL activities in our **newsletter**. [► More](#)

WE the PEOPLE

YOUR VOICE IN OUR GOVERNMENT

Help make We the People even better. Share your feedback on how this new platform can improve.

Share Your Feedback

WE PETITION THE OBAMA ADMINISTRATION TO:

Require free access over the Internet to scientific journal articles arising from taxpayer-funded research.

We believe in the power of the Internet to foster innovation, research, and education. Requiring the published results of taxpayer-funded research to be posted on the Internet in human and machine readable form would provide access to patients and caregivers, students and their teachers, researchers, entrepreneurs, and other taxpayers who paid for the research. Expanding access would speed the research process and increase the return on our investment in scientific research.

Helpful Hints

Creating a duplicate or similar petition will make it harder for you to get an official response. Instead, sign and help promote the one that has already been created.

History of Petitions

CREATE A PETITION

Successful Public Access Policy of the National Institutes of Health proves that this can be disrupting the research process, and we urge President Obama to act now to implement policies for all federal agencies that fund scientific research.

The screenshot shows the homepage of the IPL Scientific Repository. The header features the IPL logo and the text 'REPOSITÓRIO CIENTÍFICO'. Below the header, there is a search bar with a 'Pesquisa rápida' section and a 'Pesquisa avançada' section. The main content area is titled 'Repositório Científico do Instituto Politécnico de Lisboa >' and includes a 'Sobre' section, a 'Pesquisa simples' search box, and a list of 'Entradas recentes' (recent entries). The right sidebar contains 'Ligações úteis' (useful links) for RCAAP and SHERPA/ROMEO, a Facebook link, and 'Recursos RSS' (RSS feeds) for 1.0 and 2.0 versions. There is also an 'open access' logo.

July 2013 Edition

Welcome to the 13th edition of the Ranking Web of Repositories, that it is published since 2008. Two standards editions are available usually at the end of January and July.

The criteria for inclusion are very simple: The repositories should have their own web domain or subdomain and include at least peer-reviewed papers to be considered (services that contain only archives, databanks or learning objects are not ranked).

Branding, URLs, HANDLEs and DOIs in repositories.

The indicator used for estimating the visibility (impact) of the items deposited in the repositories is the number of external inlinks they received, considering as the targeted URLs those that are using the domain or subdomain of the repository. For example:

[http://www.icasa.usp.br*](http://www.icasa.usp.br)

where the asterisk refer to all the webpages and documents independently of their format.
