ILAE 2017 Classification of Seizure Types Expanded Version¹

¹ Definitions, other seizure types and descriptors are listed in the accompanying paper and glossary of terms.

² These could be focal or generalized, with or without alteration of awareness

³ Due to inadequate information or inability to place in other categories

From Fisher et al. *Instruction manual for the ILAE 2017 operational classification of seizure types*. *Epilepsia* doi: 10.1111/epi.13671
