Editor(s) : Viegas & Pinheiro & Sabino & Viegas & Brandão & Veríssimo
 Expected Release 01 Sep 2015
 Date:
 Imprint: Academic Press
 Print Book ISBN : 9780124114715
 Pages: 458
 Dimensions: 229 X 152

Describes the complexity of enviromycology/mycotoxicology from a public health point of view, creating awareness and solutions to the threat of fungal exposure

Overview

Authors

Table of Contents

Environmental Mycology in Public Health, 1st Edition

Preface

CHAPTER 1: FUNGAL SPECIFICITIES IN ENVIRONMENTAL MYCOLOGY

General Fungal characteristics

1.1.1 Cellular constitution, water and nutritional needs, secondary metabolites)

1.1.2 Dispersion Forms: Air dispersion

1.2 Outline of fungal pathologies

1.2.1. - Dermatomycosis, subcutaneous and invasive fungal infections

1.2.2 Allergic responses due to fungi exposure

1.2.3 Mycotoxicoses

1.3 Risk groups in acquiring fungal infections

CHAPTER 2: ENVIRONMENTAL MYCOLOGY IN PUBLIC HEALTH

2.1 Fungal exposure pathways and routes of exposition to fungal infection

2.2 Occupational settings - Highly contaminated Environments

2.3 Occupational settings - Low contaminated Environments

2.4 Non-occupational exposure

2.4.1 Domestic

2.4.2 Urban environment

2.4.3 Recreational (beach sand, artificial sand environments and sand boxes)

2.4.4 Hospital environment

2.5 Fungal disease outbreaks and natural disasters

CHAPTER 3: FUNGI AND METABOLITES

3.1 Dietary exposure assessment of European population to mycotoxins: a review

3.2 Mycotoxins as food carcinogens

3.3 Occurrence of mycotoxins in indoor environments

3.4 Occupational exposure to mycotoxins and preventive measures

3.5 Mycotoxins - Genotoxicity studies and methodologies

3.6 Mycotoxin Analytical Methods

3.7 Indoor microbial volatile organic compounds (MVOC) levels and associations with

respiratory health, sick building syndrome (SBS) and allergy

CHAPTER 4: METHODS IN ENVIRONMENTAL MYCOLOGY

4.1 Environmental sampling

4.1.1 Air sampling

4.1.2 Surface sampling

4.1.3 Water sampling

4.1.4 Sand and soil sampling

4.1.5 Processing methodologies

4.2 Molecular methodologies applied to environmental mycology analysis
